JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

imposed so as to interfere with commerce in as small a degree as may be consistent with the public welfare.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

To the QUARANTINE OFFICERS OF THE
SECOND QUARANTINE DISTRICT OF CUBA.

DOMINION OF CANADA.

Smallpox in British Columbia.

VICTORIA, B. C., *March 28, 1900.*

The present status of the smallpox outbreak in this Province is as follows :

Municipality.	Date of outbreak.	New cases since last report.	Total number of cases.	Died.	Recovered.	Still sick.
Nelson District	Feb. 8....	0	1	0	1	0
Rossland City	Feb. 9....	2	5	0	2	3
Nelson City	Feb. 16....	0	1	0	1	0
Nakusp City	Feb. 28....	0	1	0	0	1
Grand Forks	Mar. 7....	2	2	0	0	2

There was 1 case in Nelson diagnosed as smallpox, but subsequently was recognized as chicken pox. This case was isolated as if a genuine case of smallpox.

C. J. FAGAN,

Secretary, Provincial Board of Health.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *March 26, 1900.*

SIR: I have the honor to make the following report concerning the transactions of the Service at this port during the week ended March 24, 1900 :

The health of Liverpool remains good, no new cases of quarantinable disease being reported for the week ended March 22. The 2 cases of smallpox reported last week are still in hospital under treatment. Fifteen vessels cleared for United States ports during the week ; of these, 1 was cleared without inspection. One thousand four hundred and five emigrants were inspected and passed. Nine packages, the baggage of 8 Russians, were disinfected and labeled.

The principal establishment for the disinfection of rags intended for shipment to the United States was visited during the week. The work is done under the supervision of a special employee of the consulate here, and, in my opinion, is in strict accordance with the Department regulations bearing upon the subject. The warehouse in which the work of sorting, disinfection, and boiling is done, was in a reasonably good sanitary condition, and is reported to be free from rats or other vermin. Rags handled here are entirely of the kind used for paper stock. The traffic is not large, about 100 bales having been disinfected and shipped during the past three months. During the past year, owing to a change in the tariff regulations of the United States, the

shipment of woolen rags has entirely ceased. Owing to the well-known difficulty of disinfecting woolen rags this is not to be regretted at the present time.

The freight situation remains unchanged. No Australian or South American freight has been offered for shipment, that trade being confined entirely to London and ports in the south.

Respectfully,

H. S. MATHEWSON,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Southampton.

SOUTHAMPTON, ENGLAND, *March 26, 1900.*

SIR: I have the honor to report that the following vessels were inspected and passed at this port during the week ended March 24, 1900:

Wednesday, March 21, steamship *Saale*, of the North German Lloyd Line, bound for New York with passengers and cargo. There were inspected and passed 7 steerage and 23 first-cabin passengers and 1 large piece and 7 small pieces of luggage.

Saturday, March 24, steamship *Saint Paul*, of the American Line, bound for New York with passengers and cargo. There were inspected and passed 702 steerage and 101 second-cabin passengers and 411 large and 661 small pieces of luggage. The shipping companies, at my suggestion, have instructed their agents that all bedding will be disinfected and as a result I had to disinfect only 6 small pieces for this ship.

I have had some difficulty in getting my count of the emigrants to tally with that of the company, and, in order to be sure that I saw all that went aboard, I have numbered each emigrant's card as I stamped it, from 1 to 750 on last Saturday, and then when the clerk has finished filling them out, on Saturday morning, I have him bring to me at once all the surplus cards that are left over. As each emigrant passes me I see his card and ascertain where he is from, then the cards remaining, after each emigrant has been supplied, taken from the total number which I have prepared must be the number of emigrants that I have seen. I still have my man count as before, but formerly when our counts failed to agree, the company said these men made the mistakes, and their count must be correct. I have been trying the numbered cards now for four weeks. They have come to my figures every time, and I find that my man is quite accurate.

Respectfully,

W. C. HOBODY,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

FRANCE.

Report from Havre.

HAVRE, FRANCE, *March 26, 1900.*

SIR: I have the honor to report that on March 24 the steamship *La Bretagne* sailed from this port for New York with 900 steerage passengers, including those left over from last week. These were again inspected before embarking, and 1 case of erysipelas was detained and sent to the hospital. As all told over 1,000 presented themselves, the surplus is
